OUTLINES PROPER SYSTEM OF SPRAY

Expert From Federal Bureau Talks To Bulloch Growers On Pecan Culture.

Schley pecans can now be saved by spraying, said John R. Cole, associate pathologist, U. S. D. A. pecan field laboratory, Albany, here Thursday while talking to a large group of Bulloch county pecan growers.

Threatened with ruin by scab, the Schley pecan can now be saved by spraying. Four years of experiments and actual results among the growers have satisfied Associate Pathologist John R. Cole of the U. S. D. A. pecan laboratory, Albany, Ga., that a weak Bordeaux mixture applied positively will do it at a good profit.

Briefly this is the new method developed by Mr. Cole and his associates since 1934:

1. All old shucks are knocked from the trees before leaves appear.
2. All shucks are knocked from the trees before leaves appear.
3. If rosette is present on trees sprayed for scab, satisfactory control of both may be obtained by adding 2 pounds of zinc sulphate to each 50 gallons of Bordeaux mixture in the last three sprays.
4. If spraying isn't done right, it's worse than no spraying at all; it's thoroughness—covering every leaf and twig and nut.
5. Scab at 10 cents cannot be sprayed profitably; if nuts will bring 15 cents or better and scab is the limiting factor, spraying will pay well. Cost per tree will vary from 50 cents to \$1.25, depending on the size of the tree and the amount of spray.
6. If there is no crop, spraying is unnecessary.
7. Spraying will pay only if a complete program of fertilization, cover crops, etc., is practiced.

GEORGIA POWER COMPANY

This Farm and Home Coach, manned by this Company's personnel, carefully scheduled and announced ahead of time, is now carrying its practical message to consumers on Electric Membership Corporation lines in Georgia—as part of our expressed policy of giving assistance to the fullest on these many lines recently built to serve the farms of Georgia. Its work is being supplemented by five merchandise display coaches which are also touring the cooperative lines at the wish of the cooperatives' managements. These coaches and their operators sell nothing to cooperative members; they simply show and tell new electric users what farm and home appliances can be used, and how to use them, in order that electric service may do a full-time, profitable, satisfying job.

This is only a part of the continuing fulfillment of our pledge made in 1936, "to give the cooperative phase of electric service in Georgia full benefit of our long experience in helping customers get the very utmost in good from their electric service."

For an Electrified Georgia... NEW PLANS IN ACTION!

Confining their activities exclusively to towns of less than 1,000 population, and to the more isolated farming and rural communities, this Company's traveling demonstration kitchen coaches (similar to the one illustrated) were visited by 19,234 rural Georgia men and women at 1,198 separate appearances in three years of operation. This has been one important phase in our long-established work of showing Georgia people—by actual demonstration—the most economical and satisfactory methods of using electric service for comfort, convenience and profit, in the home and on the farm.

YOUNG LADY WRITES

MOST APPEALING VERSE

Alto Sanitarium,
April 8, 1939.

Dear Mr. Turner:

I am a patient here at Alto Sanitarium taking treatment for T. B. I get the Bulloch Times every week and enjoy reading it.

I am asking you to please provide space in your paper for the following article which was written by Miss Ellen Barnett, who is a patient here at the sanitarium. It may open the hearts of many and may they realize what the treatment means at Alto.

T. B. AT ALTO

It's such a pity that T. B. It changes our lives from A. to Z.

We go to the sanitarium to take treatment with a smile. We spend our days in a happy and contented way when many a time we've cried and cried. The worst of all to us is the fact that even our friends don't want us back. If we do get well and able to go, people who know us stare at us. Then they whisper, "She's got T. B. I hope she keeps her distance from me."

They simply think there is no cure; that our time on earth is limited sure. They never stop to think they could have it, too. It has no respect for persons but even you.

If a motion picture could be made of the whole sanitarium and all the treatment and of the life of a patient what the treatment means, we are sure there are some who will go down to the sanitarium and do everything they can to help control tuberculosis before it's too late.

Thanking you, I am,
Yours truly,
BILLY ROBERTSON.

It's got its "jeans" on under its party clothes!

The model illustrated is the Buick Special, model 41 four-door touring sedan \$700 delivered at Flint, Mich.

When you're all through reveling in this honey's good looks we'd like to have you remember: This is a Buick—through and through—and under its sleek new styling it's got its work clothes on!

You've got a husky Dynaflex straight-eight engine there that doesn't know what it means to fume or falter—yet goes mighty easy on the gas and oil.

You've got a sturdy low-swung frame and chassis—solid in its set on the road, steady-riding, firm—staunch enough for the heaviest pushing.

You've got springs of a kind that never wear out—they're coil springs, and they keep their softness without ever any need of grease. And they give better traction, longer rear tire wear, besides making the rough roads smooth!

You've got room—and a better view—and that good old reliable Buick merit run-

ing like a fine blood strain through this whole alicarriage. Now, what does it all cost you—compared with the others?

Well, look around and you'll find that this big straight-eight costs less than some sixes! It's priced even lower than it was a year ago!

And it includes in its price many a much-wanted item you'll be asked to pay extra for elsewhere.

So while you're buying why not buy the car and the value of the year—the beauty that's a husky and a bargain to boot?

"Better buy Buick!"

NOTHING takes the place of a good side dressing with Natural Chilean Nitrate of Soda. The truth of that statement is demonstrated every year on countless farms throughout the South.

Side dress with Chilean Soda and give your crops a natural lift just when they need it. Weeds and grass can't steal it from the plants. Use regularly so your crops can have full benefit of its natural fertilizing and soil improving qualities.
